EMPLOYMENT

Dibs

Co-founder and Software Developer · June 2018 to Current

An online platform that connects individuals in college communities to facilitate exchange and sharing of reusable items between them.

- Raised \$5000 in seed funding from Haverford College via the Haverford Innovations Program
- Created a cohesive design language and implemented the web app user interface
- Added "Create Item", "Report Item", user registration and authentication features using Django web framework

Instructional and Information Technology Services

Client Services Student Assistant · Sept. 2016 to Current · Haverford College

- Provided students, faculty and staff with help using College software and hardware
- Collaborated with supervisors to test and implement OS images with educational software on lab computers (Mac and PC)

Department of Computer Science

Teaching Assistant for Introduction to Computer Science · Sept. 2018 to Current · Haverford College

- Guided students in Intro CS through debugging their assignments and understanding the basics of computer programming.

EDUCATION

Haverford College

B.S. Computer Science

Expected graduation: May 2020

SKILLS

TOOLS AND FRAMEWORKS: Django, Git, UI/UX Design, Scrum, Linux

PROGRAMMING LANGUAGES: Python, JavaScript, HTML, CSS, Bash

PROJECTS

Chatter

July 2018 to Current

An open source Django-based Chat application with group chat support.

- Implemented the back-end using Django Channels and Redis
- Designed and implemented the front-end
- Wrote scripts to enable WebSocket connections between the front-end and back-end

Next Blue Bus

Dec. 2017 to Mar. 2018

A single-page web application that displays the next few college shuttle bus departure times from the current time.

- Implemented the back-end using Flask micro-framework
- Designed and built the front-end
- Used JQuery to enable live updates on the app
